When i'm lost without a word to say  
When i'm not the most intriguing, will you stay  
When i've called just to hear you say hi  
Will you find me too needy and walk away

and I know these are silly questions to ask you  
'cause you've proven to love me far beyond my faults  
and I'll hold on to every conversation if it could be our  
last

Chorus:

'cause when you're not breathing I beg for one more  
breath with you  
When you're silent, I hang on to every word  
and there are no regrets with this love

Rewind to any moment you like  
Sit back remember, I will always sit back with you  
Oh how cool you wished to be, we were both so nervous  
but at peace at the same time knowing this was right  
The time I moved in closely for what you weren't  
expecting  
Think on this, but don't miss  
Don't long for the past, long for what comes next

Chorus:

'cause when you're not breathing I beg for one more  
breath with you  
When you're silent, I hang on to every word  
and there are no regrets with this love

Come away with life, come away with love  
With something better

Chorus:

'cause when you're not breathing I beg for one more  
breath with you  
When you're silent, I hang on to every word  
and there are no regrets with this love
