

Vega 4 "Burn & Fade"

Visit "[Burn & Fade](#)" on MotoLyrics.com

I believe we could have had it all
We could have shone like stars
We lost our way

Everything has got to end sometime
We were satellites
Drifting off into space

And I'm alone in the rain
With a movie in my head
'Bout a dream you were in
Where we lost ourselves

Burn & fade away again
Burn & fade away again
Burn & fade away again
For all time

We wished too hard
On that shooting star
That burned a hole in us
But left a trail in our eyes

I don't need anything
But to know you'll be alright
And chase a dream, don't look back
Where we lost ourselves

Burn & fade away again
Burn & fade away again
Burn & fade away again
For all time

Burn & fade away again
Burn & fade away again
Burn & fade away again
For all time
