Some say "leh", some say "lah"
Uncle Phua say time to fight SARS
Everybody, we have a part to play
To help fight SARS at the end of the day

Wash your hands whenever you can
Wash with soap, then at least got hope
When you get home, take a bath quickly
"kiasu" a bit- be safe not SAR-ry.

Try not to travel to SARS countries
Wait a few months, wait and see
Eh why you rush to catch to catch that plane
Use internet , use your brain

Getting protection from this virus
Means getting healthy - inside us
Don't work too much until you're sick
Get exercise and get yourself fit.

Good nutrition and vitamins
Help you to pass the immunity challenge
Eat Your proteins, carbo and fibre
Then you can be a SAR-vivor.

PCK say don't play play
Or this stupid SARS is here to stay
But we can fight this , you and me
Help fight SARS in our country

[Chorus]
SARS is the virus that i just want to minus
No more surprises if you use your brain,
use your brain, use your braaaainnn.

Can't SARS me baby, and i don't mean maybe
You must be steady, just use your brain,
use your brain, use your braaaainnn.
