destroy
it's the vein, they're the same, lost
religion, relive the past
government's tool to keep you a passivist
yeah right, like the governments cover up scams
like the cia, fucking killing everybody
see the sky
in your veins
another broken fucking loss
suck into this absolutely nothing
loss in trance
ego trip, ego kill
in the sky
bullshit
tv fantasy hypnotize you
the lies of the state right through the fucking media
like the lies that they cover up on police brutality
like a fucking thorn in your side
but never question authority
just continue to be a slave
play this game, play this game
a slave, a slave
capitalist economy war
to keep us all down in the third world war
don't you worry, don't you sweat
just sit on your ass
and believe the fucking government
animals tortured for your clothing
sick disease, meat
fucking disgusting
crude rude, humanistic greed
"Do you love satan and all of his works?"
fuck no, i don't worship the devil at all
subversive, collective
overthrow the establishment
