I believe, I believe  
That my life is running out on me  
And I believe there's a light that I can't see  
It's your saving grace but it's not saving me

To live for and hope for

I believe that this life is killing me  
That it brings me down to drown in misery  
You don't think that I will sink but you can't see  
That the blues and grays are pouring down on me

To live for and hope for, please pray for

I believe, shut my mouth before I scream  
I can't go out, the sky is closing out on me  
I believe that I'm scared of what I see  
It isn't right the way this life is killing me

To live for and hope for, please pray for
