"Fear"

Visit "[Fear](#)" on MotoLyrics.com

Washed away the pain I knew
The fear I know's returning
The shadows fall forever again
Claiming their world around me
Crashing down upon the ground
Where I once lay before
I shiver with freight, this time I might
Die from the world around me

Chorus

The biggest fear which I possess
Is the world itself
The pain and wrong which I obsess
Is enough to make you die

The world around me growing faint
Growing blank I wish I can't
The only thing that I know
Is to hide and let it go
The fear outside my home at night
Is enough to make you angry
But instead of anger it all comes out
And I'm scared all alone tonight

Chorus

Musical Interlude

For what I do and what I know
This world around me trembles
Like the fear which I possess
Is enough to make it tumble

Chorus
