Hey, Tracey, I got somethin' to tell you...
Hey, listen!

Since you've been gone
I've been feelin' sad and blue
Just watching video
And dreaming 'bout you
By the telephone, all alone
Thinking 'bout the hours and days
Before you come home
I'm a part of you,
You're a part of me,
That's not fiction, that's reality

Without you in my life, it's not complete
You're my water and the air that I breathe
Lonely nights, lonely days,
I need you in my life each and every way
Minus you I'm half,
Plus you I'm whole
You're the something in my body and soul,
My love!

I love to love
I love the way you love me
We love to love
We love to love each other
I love to love
I love the way you love me now,
Love the way you love me now

As I look to the stars
In the heavens above,
You're the only one
That I'm really thinking of
You're the only one for me,
Don't you see?
Without you in my life
It's just so empty!
You're my fantasy, my ecstasy
You're my Tracey, my epidemy!

My love...

I love to love...

(spoken)

Well, Tracey? Hey yeah... I know it is so far away,
you're in New York, I'm in California... Yeah, I'm missing
ya... Yeah, I know, we love to love... That's what's so
special about it... Hey, I'll call you tomorrow, OK? Yeah,
bye!

I love to love...

As I look to the stars
In the heavens above
You're the only one
That I'm really thinking of
The way you make me feel is unbelievable
Our love is strong, indestructable
Say it's the proof
Say it's the fact
We love to love, let's never turn back
Minus you I'm half,
Plus you I'm whole
You're the something in my body and soul,
My love!

I love to love...
