Throw the weight of your life behind

Blindingly light conversation

Our very first beauty contest

On the edge of starvation

Film me finish me off: Film me

Film me finish me off: Finish me off

Some psychological palaver

Where you sit and claw

At the pages of another

Emotional brochure

Film me finish me off: Film me

Film me finish me off: Finish me off

Consecrated by perfect lighting

My blood spread out and danced

Then you came at me, again, again

Nasty and advanced

Film me finish me off: Film me

Film me finish me off: Finish me off

My blood just got in your switches
