Whoa, little by little
By little by little
I fell in love with you

Little by little
By little by little
I know my love is true

My eyes show
What my heart knows
There's nothing I can do

Cause little by little
I've kept on falling
Til I fell in love with you

Whoa, little by little
By little by little
You've made me care a lot

Little by little
By little by little
I gave you all the love I've got

You kissed my lips
And my heart did flips
You thrill me through and through

Cause little by little
I've kept on falling
Til I fell in love with you

My love keeps growing stronger
In each and every way
So let's don't wait no longer
Come on, name the day

Little by little
By little by little
I think you're so divine

Little by little
By little by little
I'm praying that you'll be mine

I tell the world
That you're my girl
And devote my life to you

And little by little
I've kept on falling
I hope you'll do
The same thing too

My love keeps growing stronger
In each and every way
So let's don't wait no longer
Come on, name the day

Little by little
By little by little
I think you're so divine

Little by little
By little by little
I'm praying that you'll be mine

I tell the world
That you're my girl
And devote my life to you

And little by little
I've kept on falling
And I hope you'll do
The same thing too
